

Six Months Training cum Internship with Opportunity to work in the client's organization

2020

THE FIRST ORGANIZATION TO OFFER IN TRICITY

**Founded in 2000, a pioneer IT training
company, IBM business partner**

6 Months Training cum Internship Scholarship WITH IT Company's

Unlike other professions, engineering job is based on logical implementation of knowledge in a step by step manner. A successful engineer needs to have an analytical mind and keen attitude along with strong grip on their respective technology. Allsoft Solutions with association with TryJobs.org has introduced customized training and internship program.

with the huge increase in number of engineering students all over India, the quality of engineers is degrading because more focus is given to theoretical knowledge rather than practical application of the concepts.

In our case study we have come through the difficulties organizations are facing after hiring a candidate. To mitigate the risk of job failure, satisfaction and pressure. We have concluded specific requirement training. TryJobs has signed up MoU with the various IT organizations in training the candidates as per company requirement.

To achieve the counts of manpower committed by TryJobs, we have introduced screening the capabilities, training the candidates and sending to the organization.

Our 360 degree model, will train the candidate 6 hrs a day for two month and from the third month onwards the candidate will be working on a real time project with the organization.

Who we are :Allsoft Solutions Inc, IBM Business Partner Founded in 2000 with head quarter in USA and three offices in india. We offer IT consulting, QA, Web Development and cloud services. Allsoft solutions is the first organization introduces sales force, IBM Cognos BI and IBM cloud in North India. Our research and strategy towards making and introducing new, on demand and emerging technology makes us competitive in market. Our staff is highly qualifies and certified in their respective fields.
